Fixed Bugs in Content Server 6.0 SP1

Bug #	Subject
65515	Request for dos_extension for the pdf text dm_format object to be populated with a default value.
106298	Documents in Centera are deleted before the expiration date is reached. Any document moved to Centera with an expiration date after the year 2038.
121160	Cannot add more than 99 repeating attributes. Getting Oracle errors when importing documents. ORA-01745: invalid host/bind variable name
123280	The java method code (dm_bp_transition_java) that executes lifecycle steps attempts to use the state number rather then the state index to lookup java module.
126260	i_cabinet_id attribute of dm_sysobject is not being indexed by FAST fulltext
127336	5.3 SP4 - Most scripts in esignature suite failed because esignature method fails with error:[DM_SYSOBJECT_E_ESIGN_SIGNATURE_METHOD_FAILED]error: "Method 'esign_pdf' failed. Method Returned : -1 : Arguments: "sp4mar" "tuser2" "090d75c380002604" "/ex
129044	ENABLE FTDQL hint does not properly interpret not equal operator (!=) for boolean attribute
130316	The user marked as unavailable still gets the task notification.
131642	Currently it is not possible to make searches based on location if the number of subfolders defined in the location to search from exceeds 25000 Folders.
133796	ACS/BOCS access violation when a user accesses content.
134535	Content server allows an object under retention to be saved as the same version. The out of the box RM and RPS applications have their own mechanims to prevent users from doing this.
135259	When doing a Search via location (query uses folder descend) The query performance is so bad that it can take several minutes to return result which results in timeout errors
135700	The server gets stuck in certain unknown circumstances while doing LDAP authentication
137987	FAST does not handle password-protected or encrypted documents well.
140635	Documentum API does not allow users to insert more than 45 children at once into a virtual document. A save() operation has to be performed.
141064	The instructions given in the CS Installation Guide for 5.3 sp3 on page 42 should be changed to "C:\Program Files\Documentum\java\java_version\bin"
141350	Memory Leak (java.lang.OutOfMemoryError) in docbasic when using Java DFC
142550	A user with SYSADMIN privileges cannot create an LDAP user. When the user_source is set to 'LDAP' errors are displayed depending on the setting of the user_login_domain and the user is not created.
143881	Content Server generates a SQL query with a new alias for the table name
144264	Documentation Bug in the release notes of Content Server 5.3 SP3
144560	DQL including "XML Zone Searches" isn't working as expected
144650	ENABLE(FTDQL) hint returns errors when fulltext searching in dm_cabinet type

144977	Thye support of "LDAP Dynamic Groups" is needed for SUN Java System Directory Server (formerly Netscape/IPlanet) version 5.3. e.g. LDAP Dynamic group is represented by LDAP URL which is a query that resolves the membership of the group.
145505	Running 2 addesignature commands simultaneously (each on a different document) causes an access violation in the server log
146068	select * from dm_resync_dd_attr_info order by type_id asc
146351	Problem when replicating PDF rendition of a native PDF
146983	Doc Bug: Page 93 of the Content Server D6 Install guide
147139	Removing any user from group which has members who are inactive users will display a error in the messagebar if you only have Administrator privileges. The user is not being removed from group. Error message:[DM_GROUP_E_CANT_ADD_GROUP_TO_USER]
147195	Documentation (Release Notes) Bug. The release notes for 5.3 sp4/sp5 says Sybase 15 client libraries is required. But for solaris/sybase that is not the case
147896	update dmr_content_r set index_operations=:I_OP
148000	If the prune API is used to delete all versions of a dm_document
148964	Electronic signature gets cut off when user name contains an apostrophe after another signature has been applied to the document
151224	Problem with LDAP users with apostrophes in their names.
